Memorial Trees - A Living Memorial

A tree is a most fitting tribute. With a tree planted is an idea, a hope, and a challenge. It fosters the idea that one can remember through living trees and forests. It provides hope for the future of our environment and, most importantly, it challenges each one of us to take an active part in protecting our natural heritage.

Individual trees and their specific location are not identified. All tree species are native to the area and planted within the St. Clair Region in the Spring and Fall, where needed most. A memorial tree planting and dedication ceremony is held each September. Donors and certificate holders will be notified of further details closer to the date.
