AgriSuite & Soil Analysis Workshop

Hosted by St. Clair Conservation & Ministry of Agriculture, Food and Rural Affairs

What is AgriSuite? It is a suite of free web-based decision support tools developed by OMAFRA, available at agrisuite.omafra.gov.on.ca. The tools on AgriSuite can help you determine the best management practices for your farm that will:

save money by improving the amount of fertilizer and other materials used

reduce the environmental impact of on-farm generated nutrients and protect drinking water sources

reduce soil erosion, maintain soil productivity, and manage the beneficial use of off-farm wastes on agricultural land

What will be covered? At this workshop, you will learn about the new AgriSuite tools available, how to use them, how to prepare a custom Field Management Plan, and how to interpret your soil sample results.

What to bring? For the hands-on portion, please bring:

1. A laptop/tablet (recommended) or smartphone to access AgriSuite online
2. Set of information for a field of interest
e.g. soil tests, crop and yield history, records of manure/organic amendments and fertilizer applied (note that this information is not collected, it is for your use)

This workshop will offer 2 CCA CEUs and is a KSE for approved OFCAF Nitrogen Management projects

When?
Where?

Wed Mar 13, 2024 10:00am-12:30pm followed by free lunch
Warwick Community Centre
7074 Egremont Road, Watford, ON

Cost?

Free
